

LaKeysha Strickland

MBA, CSM, CSPO, AWS AI Practitioner

SYSTEMS ENGINEER II | AUTOMATION & CHANGE MANAGEMENT

St. Louis, MO | 314-307-4921 | keystrickland@charter.net | [LinkedIn](#) | [Live Project](#)

PROFESSIONAL SUMMARY

Results-driven Systems Engineer II with 12+ years of experience spanning enterprise network operations, change governance, and AI-assisted automation. Specializes in building production-ready tools with Python, Microsoft Power Platform, and Amazon Kiro that prevent service-impacting outages, eliminate manual processes, and give operations teams faster, data-driven decisions. Architected an enterprise Deconfliction Dashboard that prevents 10-19 potential outages daily and automated carrier maintenance workflows across 13+ provider relationships. Recognized for delivering high-impact solutions, standardizing governance processes, and training cross-functional teams at scale.

CORE SKILLS

AUTOMATION & DEVELOPMENT

Python | Amazon Kiro | Amazon Q | Claude Code | Power Apps | Power Automate | AI-Assisted Development | GitHub / GitHub Pages | Outlook COM Automation | REST APIs | Regex

CLOUD & PLATFORMS

AWS | Amazon Bedrock | Azure | SharePoint | Microsoft Teams | Microsoft 365

OPERATIONS & PROCESS

Change Management | ITIL Framework | Risk & Impact Analysis | Method of Procedure (MOP) | SOP Development | Agile / Scrum | Six Sigma | Compliance & Governance

TOOLS & REPORTING

BMC Helix | Jira | Asana | Tableau | Excel / openpyxl | Technical Training | Stakeholder Management | UAT

PROFESSIONAL EXPERIENCE

Systems Engineer II - Automation & Change Management

Mar 2026 - Present

Spectrum (Charter Communications) | St. Louis, MO

- Architected and deployed an enterprise Deconfliction Dashboard and Portal using Amazon Kiro and Microsoft Power Apps that identifies overlapping maintenance activity before implementation, preventing 10-19 potential customer-impacting outages daily.
- Built a Python-based carrier maintenance automation system that monitors a shared Outlook mailbox, detects notifications from 13+ carriers via regex parsing, and auto-generates pre-filled CRQ records mapped to CM Portal MOP Mgmt fields -- eliminating manual inbox monitoring entirely.
- Coordinate ~50 enterprise change tickets weekly and ~20 third-party carrier tickets daily for Comcast, Lumen, Netflix, and other telecommunications and content partners.
- Collaborate with 20+ engineering and operations teams nationwide to validate impacts, correct ticket data, enforce approved MOPs, and reduce operational risk.
- Updated and standardized 6 SOPs to strengthen governance, improve consistency, and clarify execution requirements across engineering workflows.
- Train employees on impact corrections, carrier ticket workflows, MOP selection, and internal tools; produce video guides and technical documentation to accelerate adoption.
- Leverage Amazon Q for code support, documentation, testing, and workflow automation; represent the team in cloud-related meetings and communicate updates to stakeholders.

Change Control Analyst II

Mar 2019 - Mar 2026

Spectrum (Charter Communications) | St. Louis, MO

- Led analytic oversight of scheduled network maintenance, identifying resource and cross-service collisions across a converged enterprise network serving millions of subscribers.

- Served as primary point of contact for third-party carrier maintenance, coordinating complex changes among engineering, operations, project teams, and external providers.
- Prepared operational reporting, analyzed maintenance trends, and recommended process improvements that strengthened compliance and network reliability.
- Developed change support documentation, manuals, procedures, and training materials while performing impact assessments and risk reviews in alignment with ITIL practices.

Change Control Analyst

Jan 2017 - Mar 2019

Spectrum (Charter Communications) | St. Louis, MO

- Coordinated and facilitated scheduled network maintenance while enforcing change policies designed to protect the Spectrum network and revenue-generating customers.
- Analyzed customer and service impacts, escalated conflicts, and supported carrier-class operating practices across enterprise maintenance activity.

Internet & Voice Repair Technician

Jan 2014 - Jan 2017

Spectrum (Charter Communications) | St. Louis, MO

- Resolved complex internet and voice service issues, managed customer escalations, and consistently met service-quality and customer-experience targets.
- Earned the Spectrum BEST Award for outstanding customer service performance.

KEY PROJECTS

Enterprise Deconfliction Dashboard & Portal

Amazon Kiro, Microsoft Power Apps, SharePoint, AI-Assisted Development

- Took the solution from business problem through design, development, testing, user adoption, and ongoing enhancement; partnered with a colleague for SQL integration support.
- Centralized maintenance visibility so specialists can identify ticket collisions before execution, reducing outage risk and eliminating hours of manual research per day.
- Delivers proactive conflict detection used daily by the Change Management team to make informed go/no-go decisions on scheduled maintenance.

Third-Party Carrier Maintenance Automation

Python, Outlook COM (pywin32), Microsoft Teams Webhooks, openpyxl, Amazon Kiro

- Engineered an end-to-end automated workflow that connects to the ChangeManagement-Carrier shared mailbox via COM automation, detects maintenance emails by subject-line keywords, and extracts structured data using configurable regex patterns.
- Sends real-time Adaptive Card alerts to Microsoft Teams upon detection, giving the team instant visibility into incoming carrier work without manual inbox monitoring.
- Auto-generates pre-filled Carrier CRQ records with impact auto-determination logic, scheduled dates, and carrier-specific assignee group mapping for 13+ providers.
- Maintains a persistent tracking spreadsheet with duplicate detection, enabling full ticket lifecycle management from detection through CRQ creation.

Phoenix Travel Digital Experiences

Amazon Kiro, GitHub, GitHub Pages, HTML/CSS

- Built and deployed live customer-facing travel sites featuring interactive itineraries, RSVP pages, and payment summaries for group travel clients.
- Used AI-assisted development to translate business requirements into polished web experiences, managing source control and production publishing through GitHub Pages.

EDUCATION & CERTIFICATIONS

Master of Business Administration (MBA) | Louisiana State University | 2026

Bachelor of Science, Business Administration | Lindenwood University - Dean's List | 2021

- AWS Certified AI Practitioner
- Certified Scrum Product Owner (CSPO), Scrum Alliance, 2023
- Certified ScrumMaster (CSM), Scrum Alliance, 2022
- Project Management Certificate, NYU (Pathstream), 2024
- Six Sigma: Green Belt
- Six Sigma: Yellow Belt
- Scrum Fundamentals Certified (SFC)

AWARDS & COMMUNITY LEADERSHIP

- Spectrum BEST Award - recognized for outstanding customer service performance.
- Selected by a director for consideration for the WICT Women to Watch recognition.
- Active in NAMIC and WICT professional-development initiatives; Make-A-Wish volunteer.
